

# The worldwide neural control network soap

From the end of the second world war and mostly in the cold war remote **neural control networks** [1] was developed.

Nowadays it is a multi layer radio frequency networks which structure is similar to Internet tier division.

It's a soap of different radio service, very complex to analyze because of a smoke curtain covering this type of networks. Why? Because in the past they was utilized by secret services and nowadays are utilized my a digital mafia that hack human brains. Manipulate masses. Change political views. Destroy families. Bet on suicides. The aristocratic cast, the Vatican, audiovisual monsters, big tech facilities and also public and private space companies "play" with this.

The image is a promotional poster for the 'Neuro Informatics 2018' conference. It features a dark background with the 'incf' logo on the left, which consists of a stylized 'i' with a dot and the letters 'ncf'. To the right of the logo, the text 'Neuro Informatics 2018' is written in a large, light blue font, with 'Montreal, Canada | August 9 - 10' in a smaller font below it. On the right side of the poster, there is a 3D rendering of a human brain with glowing blue and yellow nodes and circuit-like patterns, symbolizing neural networks. Below the brain, the word 'Speakers' is written in white, followed by three names and their affiliations: 'Yoshua Bengio University of Montréal', 'Sharon Crook Arizona State University', and 'Moritz Helmstaedter Max Planck Institute for Brain Research'.

Something that is destroying the Europe Union and democracy. Here is a scheme from a **target individual** [2].

Who bind those services? Facilities that buy services from official providers that bind legal services and got also this product *under the table* for big telecommunications clients. Normally are businessman that use to create B-side networks in a state and clean them in another with legal services. Medium hackers crew create small networks like this; but also governments silently sniff data about. It's the digital mafia.

Last mile normally is soak into official infrastructure. It's not a secret all the patents are public. A lot of are from the US patents office but there is someone from India, Pakistan, China, Taiwan and Korea. But can also be forged upon software defined radios.

Who are target individuals? For example who are classified as terrorist, like **ETA** [3] in Spain, by governments was controlled by remote neural networks. But in the last ten years someone come to speculate over those networks forcing human clients to join this hell because of data selling to big tech companies, military facilities and audiovisual industry. Because of big masses manipulation.

I'm in active remote neural control from November 2017 and probably in passive from when I came to Spain. Ten years of passive and two of active with subliminal voice to skull service. I've lost all what I've done, but not my mental clearness.

This is only an horrible crime that they have done with my brain data and bet over my life.

*I'm public writing all of this because of **justice**. It's difficult to demonstrate but a very important person in Spain is helping me in this network. So I'm doing it. Thank you great man and person. I'm searching for the woman that I'm love to and this book is dedicated to her and her baby. They forced her to go out from our house five years ago.*
