(U) Project Description

(S//SI//REL TO USA, FVEY) The Special Source Operations (SSO) Project provides management oversight and logistical support to the Special Source Access programs. These resources are used to provide cross-program management services to drive efficiencies within the Special Source Access Expenditure Center (EC).

(U) Base resources in this project are used to:

███

- (TS//SI//NF) Sustain MYSTIC capabilities to provide comprehensive metadata access and content against ███████████████████████ and add an additional target country to the portfolio. Capabilities will offer near-real time, complete access to the additional target country's ███████████, and provide for retrospective tasking and near-real-time access/delivery of metadata as required.
