

(S//SI) SINIO Summer Seminar CI/CT NEXUS

FROM: Marilyn Maines
Deputy Chief, Strategic Intelligence Issues (S17)
Run Date: 06/15/2005

(S//SI) On Tuesday, 21 June 2005 the SINIO Council and the National Cryptologic School are pleased to present the 3rd in a series of Strategic Intelligence Issue Seminars for the Summer 2005. "CI/CT NEXUS" will be presented by the SINIO for Counterintelligence and Denial & Deception, Mr. [REDACTED] on **Tuesday, 21 June from 11:30 to 1300 in room 2E099**. Advance registration is required.

(S//SI) Eligible SID students interested in attending this brown-bag session should enroll for class number 7526 using Peoplesoft. Enrollment will be first come, first served. In case of difficulties with Peoplesoft an email can be sent to Roland Recker ([REDACTED]) with the following information, and include the course name (AREA 1500 -- "CI/CT Nexus"), your name, SSN and organization.

Course Overview:

(U//FOUO) During the Cold War, the U.S. CI community had the luxury of playing defense. Sometimes it failed, as a number of spies evaded detection for many years. These spies inflicted serious damage on U.S. National Security. Today, the U.S. is at war and playing defense is no longer an acceptable tactic.

(S//SI) To address the war on terror and the nexus between CI and CT, the National CI strategy has adopted a more offensive posture. CI analysts have long-studied information on enemy security services to deny and disrupt their collection efforts and also to penetrate their agencies. Terrorist tactics rely on surprise, clandestine operations, and compartmentation. The tactics they use provide the nexus between CI and CT. LTG Odom (USA, Ret) noted that "CI is intelligence about the enemy's intelligence...because terrorists have much in common with spies, operating clandestinely, CI must also include counterterrorism intelligence, both domestically and abroad." This seminar, will examine the overlap in tactics and tradecraft between CI and CT.

(U//FOUO) Please consult the SINIO Website ("go sinio") for information on future events in this series.
