

**WALK—DO NOT RUN—
TO THE EXIT**

Editor The Chronicle—Sir: Chester Rowell remarks that pseudoscience will have to guess again in regard to the causes of depopulation and overpopulation. Rowell's arguments are unanswerable, but there is nothing to prevent editors and others to keep on guessing and worrying about population, as they have done for centuries.

The ebb and flow of population is controlled by the Hierarchic Ray (this is a mystery) concentrated in the sun. The Hierarchic Ray controls the migrations of the Incarnating Egos through their cycles of enfoldment amongst all nations and directs their flow from nation to nation and from race to race, according to a compensating law of nature, universal in the cosmos. When a species of race has served its purpose for the age, the Incarnating Egos begin to migrate elsewhere and that race of men begins to decrease and die out.

That is the reason in a nutshell, and in the long run there is little man can do to stop either decrease or increase, excepting to add to the number of imbeciles and incompetents, and make it so much harder for advanced Egos to proceed.
