

The Future Seen in a Ten Cent Store Crystal

Editor The Chronicle—Sir: Many of your readers have expressed opinions in the Safety Valve on the war situation in the Orient. May I give the following synoptic interpretation of symbolic prophecies written in various sacred scriptures, relative thereto:

Japan will maneuver herself into control, and from Ankuo, formerly Manchuria and Inner Mongolia, will wrest Siberia from the soviets. In time she will wheel about and come south into Western Asia and wrest control of Asia from the white race, which will cause a great conflagration that will precipitate the end of this age. That conflagration will cause the disintegration of the present nations of Europe and consolidation of their remnants. The Western Hemisphere will be involved to the east and to the west. Our present forms of government and religion will also perish. In the course of ages an entirely new civilization will come forth that will spread from a new land in the north, as the ice age in the North Polar regions vanish. As for the Japanese and Japan, they will in time be absorbed by the people they conquer, and in a million years their islands will be reduced to a low-lying archipelago, rather cold and sparsely inhabited. Such is their fate!

OLE J. SNEIDE.
